PROJECTS

Gamerspoint   Github

- It's an e-commerce web application for computer accessories and gaming equipment.
- It also features an ADMIN dashboard.
- This project was developed in C# (Core), using Visual Studio's internal database, and HTML and CSS for the site layout and design.

Zoom Clone   Github

- A single app that combines team meetings with live chat from anywhere.
- It was developed using node.js, HTML and CSS.

Apna Shop (On-going)

- It is a web application to facilitate e-commerce for clothing.
- As well as having a user dashboard, it also includes an ADMIN dashboard.
- Along with HTML, CSS, and JavaScript, Java was used in the backend, together with MySQL.
